

Student, Central Public School
Using a Makey Makey
Transcript, June 2019

We have lots of fun playing with the Makey Makeys. It was very each to teach the younger kids how to use them. We like to play the bongos and the pianos with the Play Doh. It's pretty easy to set up the Makey Makeys. You don't need to download anything, you can just search up what you want to do and do it.

To set up the Makey Makey, you connect the USB cord to your Makey Makey in your computer. You put the alligator clip on the buttons you need. Connect them to your objects. Connect a clip to the section and hold the other side of the clip. Then you can play.

Makey Makeys are fun!
