

Transcript: Learning Commons Gami (Lisa Wallace)

Hello, Worthington teachers! It's your friendly neighbourhood teacher-librarian here. I hope you enjoyed your summer and are as excited to be back at school as I am. As you've noticed, our library has changed and will continue to change over the next few years. We are moving from a traditional library setting towards a library learning commons or LLC.

How will the LLC work for you? We will continue to collaborate on learning. Whether it's a lesson, a unit of study or teaching a research skill, I'm here to work with you and all of your students. Let's find a way to reach your reluctant readers, to challenge your higher-level readers and to encourage your low readers. Naturally, we will continue our literacy and numeracy sessions, through reading and discussing stories related to character development and monthly themes, and, of course, our Box Cars and One-Eyed Jacks math games. These math games, as you know, reach students at their level and help them to improve their math skills and number sense in a fun and relaxed way.

In addition, next year, I will be collaborating with Derek Lambert to introduce additional technology, such as Google Apps, Dash and Dot and coding, to your students. I'm very excited about the changes that are happening at the LLC at Worthington, and I hope you are too. Please drop by and see me or send me an email to let me know how we can work together with your students in the LLC this year. See you soon!
