

Grade 5/6 Student, Central Public School  
Using a Micro:bit  
Transcript, June 2019

Kay, so I programmed a Micro:bit to do a sorting hat. It's really fun and it's challenging when like you don't know it so I learned for myself and I know how to do so it really, really fun. Yeah.

And they're really awesome and I like them very much and we did it in class, did the sorting hat with Micro-bits and then I got Ravenclaw and we sorted our class into Harry Potter houses and it's, they're really, really fun.
